Ph.D. studentships in Supramolecular Inorganic Chemistry for 2002

Lee Brammer
Reader in Inorganic, Supramolecular and Solid State Chemistry, University of Sheffield

• Four Ph.D. studentships* are available starting in 2002. All are available immediately but all can be taken up in October 2002, if preferred.

Projects
1. Halometallate ions in supramolecular chemistry and recognition of hydrogen bond donors

2. Silver(I) carboxylates as inorganic analogues for carboxylic acids in supramolecular chemistry

3. Rings, cages and networks from combining coordination chemistry or organometallic chemistry with hydrogen bonds

4. Supramolecular coordination chemistry of functionalized pyrimidines

Application forms and forms for references can be obtained via the web at http://www.shef.ac.uk/~gradsch/Recruitment/ApplicationForm/index.html

* Funds are available to support students from the UK or EU on each of these projects. Applications from students outside the EU will be accepted but it would be advisable to first check if funds are available to cover the additional non-EU student fees.
